Contents of Volume 4

Number 1, January 25, 1961

M. Sensenbrenner, A. M. Bader, T. Terranova, and P. Mandel. A Comparison of the Amounts of Deoxyribonucleic Acid in the Nuclei of Proteus P18 and Different Forms of L Phase Derived From It 1
(Received November 17, 1960)

B. H. J. Hofstee. Composition and Molecular Shape of Chymotrypsin-Nucleic Acid Complexes 5
(Received November 23, 1960)

S. Gatt and E. R. Berman. A New Glycolipid in Tay-Sachs Brain 9
(Received December 6, 1960)

Lewis R. Mandel and Ernest Borek. Variability in the Structure of Ribonucleic Acid 14
(Received December 5, 1960)

L. V. Hankes and R. R. Brown. 3-Hydroxykynurenine-Keto-C^{14}: A Precursor of Urinary Quinolinic Acid 19
(Received December 13, 1960)

A. Rossi-Fanelli, P. L. Ipata, and P. Fasella. On the Distribution and Transformation of Thiamine and Its Phosphoric Esters in Biological Material .. 23
(Received November 22, 1960)

F. Franek. Dissociation of Animal 7 S γ-Globulins by Cleavage of Disulfide Bonds 28
(Received December 7, 1960)

Surendra S. Parmar. Stimulation of Brain Respiration by Thiosalicylic Acid .. 33
(Received December 12, 1960)

Martin Klingenberg and Peter Schollmeyer. On the Relation Between the Activation of Succinate Oxidation and the Activation of DPN Reduction in Mitochondria 38
(Received December 13, 1960)

Peter Schollmeyer and Martin Klingenberg. Oxaloacetate and Adenosinetriphosphate Levels during Inhibition and Activation of Succinate Oxidation 43
(Received December 13, 1960)

Dinor O. Voss, Annibal P. Campello, and Metry Bacila. The Respiratory Chain and the Oxidative Phosphorylation of Rat Brain Mitochondria 48
(Received December 15, 1960)

Raymond K. Main and E. Richard Walwick. A Simplified Quantitative Assay for Tritiated Thymidine Incorporated into Deoxyribonucleic Acid 52
(Received December 17, 1960)

W. L. Belser. Uracil Biosynthesis in *Serratia marinorubra* 56
(Received December 23, 1960)

William W. Bromer and Edwin O. Davisson. Isolation of an Intrinsic Factor-Vitamin B_{12} Complex 61
(Received December 23, 1960)

C. W. Wrigley and Anthony W. Linnane. Formic Acid Dehydrogenase-Cytochrome b_1 Complex from *Escherichia coli* 66
(Received December 27, 1960)

M. A. Spirtes. Some Observations on the Swelling of Mitochondria Caused by Naturally Occurring Agents 71
(Received December 27, 1960)

I. Zipkin, S. E. Mergenhagen, and R. Kass. The Sialic Acid Content of Human Saliva 76
(Received December 29, 1960)

H. R. Mahler, B. D. Mehrotra, and C. W. Sharp. Effects of Diamines on the Thermal Transition of DNA 79
(Received January 3, 1961)

Colin H. Doy, Americo Rivera, Jr., and P. R. Srinivasan. Evidence for the Enzymatic Synthesis of *N*-(5′-Phosphoribosyl)anthranilic Acid: A New Intermediate in Tryptophan Biosynthesis 83
(Received January 4, 1961)

Number 2, February 24, 1961

Ronald W. Estabrook. Effect of Oligomycin on the Arsenate and DNP Stimulation of Mitochondrial Oxidations 89
(Received January 5, 1961)

David P. Kosow and M. Daniel Lane. Restoration of Biotin-Deficiency-Induced Depression of Propionyl Carboxylase Activity *in Vivo* and *in Vitro* .. 92
(Received January 5, 1961)

Gumpei Urata and S. Granick. Aminoacetone Formation and Decomposition in Liver 96
(Received January 5, 1961)

M. R. Raghavendra Rao and W. W. Altekar. Aconitate Isomerase 101
(Received December 29, 1960)

R. Duncan Dallam. A General Mechanism for Oxidative Phosphorylation 106
(Received January 3, 1961)

Helen M. Habermann and A. R. Krall. Catalysis of Photophosphorylation by Allagochrome 109
(Received January 13, 1961)

Masao Tanaka, Yo Kato, and Shukuo Kinoshita. Glutamic Acid Racemase from *Lactobacillus fermenti*, Purification and Properties 114
(Received January 13, 1961)

K. Krisch and Hj. Staudinger. Solubilization of Acetanilide Hydroxylase from Hog Liver Microsomes 118
(Received January 16, 1961)

Lothar L. Salomon, James A. Allums, and David E. Smith. Possible Carrier Mechanism for the Intestinal Transport of D-Xylose 123
(Received January 18, 1961)

Ian C. Caldwell and George I. Drummond. Enzymes of Acetoacetate Formation 127
(Received January 20, 1961)

W. W. Wells and P. A. Mores. Oxidation of the 4α-Methyl Group of Methostenol to Carbon Dioxide by the Rat, *in Vitro* and *in Vivo* 133
(Received January 24, 1961)

G. Popjak, DeW. S. Goodman, J. W. Cornforth, Rita H. Cornforth, and R. Ryhage. Mechanism of Squalene Biosynthesis from Nevalonate and Farnesyl Pyrophosphate 138
(Received January 25, 1961)

Nathan Citri and Nachman Garber. Evidence for a Change in the Active Site of Penicillinase Caused by a Competitive Inhibitor 143
(Received January 26, 1961)

A. Bonsignore, G. Fornaini, G. Segni, and A. Seitun. Transketolase and Transaldolase Reactions in the Erythrocytes of Human Subjects with Favism History 147
(Received January 26, 1961)

D. E. Griffiths and David C. Wharton. Purification and Properties of Cytochrome Oxidase 151
(Received January 26, 1961)

A. Cantarow, T. L. Williams, and K. E. Paschkis. Uracil Incorporation in Liver RNA of Young and Pregnant Rats and in RNA of Fetal Tissues and Certain Tumors 156
(Received January 31, 1961)

ERRATUM

Number 3, March 10, 1961

H. J. Hohorst, F. H. Kreutz, and M. Reim. Steady State Equilibria of Some DPN-Linked Reactions and the Oxidation/Reduction State of the DPN/DPNH System in the Cytoplasmatic Compartment of Liver Cells *in Vivo* .. 159
(Received January 30, 1961)

H. J. Hohorst, F. H. Kreutz, M. Reim, and H. J. Hübener. The Oxidation/Reduction State of the Extramitochondrial DPN/DPNH System in Rat Liver and the Hormonal Control of Substrate Levels *in Vivo*..... 163
(Received January 30, 1961)

E. Kirsten, R. Kirsten, H. J. Hohorst, and Th. Bücher. Free Amino Acids in Alloxan Diabetic Rat Livers 169
(Received January 30, 1961)

STATEMENT OF POLICY

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS has been initiated to meet the need for the rapid dissemination of information in all areas of experimental biology. This new medium is intended to afford an opportunity for rapid publication of timely and significant observations in the form of short but well documented communications. It will enable investigators in diverse fields of modern experimental biology better to keep abreast of current ideas and findings.

Rapid dissemination of this knowledge should prevent unnecessary duplication of effort; furthermore, new and exciting information will reach investigators in a minimum length of time.

It is hoped that authors will feel free to submit reports of current investigations which will be of immediate value to other scientists and promote the general progress of biochemical and biophysical research.
